

CLIMA CORE

HEATING OR

Clima Core panels are gypsum fiber components designed with precision-milled channels to accommodate underfloor heating or cooling systems.

Clima Core elements offer an easy, energy-efficient solution for hot and cold water-based underfloor heating or cooling in office environment.

These durable, fire-resistant panels are straightforward to install.

With easy-to-follow instructions, the **Clima Core** system supports all flooring types, whether glued or floating, ensuring flexible installation across your spaces.

Key benefits:

- **Primed on both sides**
- **Easy to lay and quick to walk on**
- **No screws required for installation**
- **Ready for floor covering within 24 hours**
- **Promotes a healthy environment: low-emission and free of pollutants**
- **Suitable for indoor use**

With its excellent thermal conductivity, **Clima Core** provides ideal conditions for use in low-temperature systems, enabling efficient energy utilization. Its modular design allows for flexible adaptation to both new construction and renovation projects, while the simple dry construction method ensures particularly short construction times.

COOLING COMFORT

Clima Core Bubbles

- Redirected panel
- Dimensions: 600 x 600 mm

Clima Core Octopus

- Heating circuit distribution panel
- Dimension: 600 x 600 mm

Clima Core Straight

- Grooved panel
- Dimensions: 600 x 600 mm

Clima Core Magnum

- Grooved panel
- Dimension: 1200 x 600 mm

TRADITION PRECISION INNOVATION

Mission

Weiss Doppelbodensysteme GmbH combines tradition, precision, and innovation to develop high-quality access flooring systems for demanding customers. Our mission is to ensure customer satisfaction through sustainable and durable solutions while contributing to environmental conservation.

With a focus on precise manufacturing, the use of cutting-edge technologies, and natural materials, we create products that meet the highest standards. At Weiss, tradition and innovation go hand in hand to exceed our customers expectations and build long-term partnerships. Our commitment to sustainability, precision, and continuous improvement makes us a reliable partner for forward-thinking flooring systems.
